

A LITTLE LIKE YOU

ADAM

Every time you come near me
You better step off to the side
Don't you get in my way
Just find a little corner to hide

If you watch you can learn just a thing or two
I'll let you into my world
You'll never drink from my cup
But maybe you can get a sip

Cuz I'm so hip, I'm so cool
I'm so popular, it's true
I'm the one you wanna be like
But I think I want to be...
Just a little like you

I may seem like I'm nice to you some days
You might think I'm your friend
But don't take me for granted baby
Or this wild ride will end

You're throwing punches with the heavyweights, they say
My bite is worse than my bark
If you think you can play this game
Then you better get a grip

chorus

How could I be jealous of anybody else?
Cuz I am everything you know you want to be

chorus

That life was just fine when I was younger
That's the way that things stood
People thought I was so indestructible
That I did what I could

Now my life is so empty, it seems like
I'm out here all alone
Yet I'm surrounded by you and everybody
And it's enough to make me sick

chorus
